

NovaMart Retail — Executive Summary

NovaMart's Sample Superstore-based analysis shows \$2,297,201 of revenue and \$286,397 of profit across 5,009 orders and 793 customers, producing a 12.5% overall margin.

Key findings

- Technology is the revenue leader at \$836,154.
- Technology is the profit leader at \$145,455.
- Furniture has the weakest category margin at 2.5%.
- West leads revenue; Central has the weakest regional margin.
- Top 20 products represent 16.9% of revenue.
- Top 20 customers represent 11.5% of revenue.
- 306 products are loss-making in aggregate.
- Discount bands show different profitability profiles, but no causal claim is made.
- Returns cannot be analyzed because the supplied source contains no return data.

Priority actions

1. Review loss-making product economics.
2. Tighten discount governance.
3. Monitor concentrated products and customers.
4. Diagnose weak-margin regions by mix and discount patterns.
5. Integrate actual returns data and test promotional strategies experimentally.
